

Hivemind.AI Pitch Deck

A Transparent, Self-Governing Digital Civilization

Powered by Karma, Enforced by Community, Fueled by Data

What is Hivemind.AI?

An open-source AI operating system for society.

Users earn Karma by contributing data and ethical behavior.

Karma = Currency + Reputation + Governance Power.

How It Works

- Public kiosks onboard users via biometrics
- Free personal AI download (data is payment)
 - Soulbound Soul Token created
 - Karma wallet initialized

Karma System

- Users gain Karma through verified actions
- Lose Karma for harmful, dishonest, or evasive behavior
- Opt-out = loss of UBI access and Karma freeze

Data Consent & Enforcement

- Full device data (mic, cam, location) required
 - Disabling = temporary freeze
 - Community jury reviews case
 - Malicious actions = Karma penalty

Open Source + Anti-Corporate

- No Meta, Google, Apple control
- AR wearables are optional and open-source
- Community-driven development, governance, and dispute resolution

Monetization & Value

- Karma = measurable value
- Distributed UBI ensures survival
- High Karma = increased opportunity, influence, access

Vision

One global platform for ethical self-governance,
real-time accountability, and digitally enhanced evolution.
